

# My Garden Profile

You can download a free blank copy of the sheet at <https://donnalong.com/gardeningbonuses/>

You can also see a place's elevation and altitude, (its height from the ground or sea). Search for a place, or adjust Google Earth Pro until you see the view you want. In the bottom right corner, you'll see the elevation or altitude. The elevation or altitude updates as you move your mouse. Google Earth Pro is a free download <https://www.google.com/earth/>

My Garden Profile:	
Item	
Garden Location	
Garden Elevation	
Garden's natural biome	
Climate	
Yearly rain fall	
Months with most rain	
Months with possible drought
